WORK EXPERIENCE

Software Engineer - II
GeekyAnts ⇗

02/2022 - 10/2023   *Bangalore*

Achievements/Tasks

- Contributed to frontend development from project inception, actively participating in client and internal team discussions, gaining deep insights into project requirements, and employing ReactJS, Redux, and CSS3 for meticulous design and implementation.
- Designed and created web components for the company's React & React Native UI library for web and mobile, employing ReactJS, Material UI, and Tailwind CSS.
- Played a key role in a ReactJS web project, focusing on various services using ReactJS, Redux Saga, Material UI, and using GraphQL APIs, while actively participating in team discussions and workflow planning.
- Developed UI components with Material UI and Tailwind CSS, integrating APIs, using Next.js, TypeScript and Redux Toolkit.
- Developed an internal MVP using React, TypeScript, Fabric.js, and Redux, including designing and developing the application's UI, implementing CRUD operations for the project's services, and conducting manual testing to ensure functionality and performance.

PROJECTS

Foodit | Food Ordering Mobile Application || React Native | Redux Toolkit | TailwindCSS | TypeScript

- SourceCode
- Foodit is a **mobile application** designed to streamline the **food ordering process**, providing users with an intuitive and seamless experience for **browsing, selecting, and ordering from a variety of restaurants.**

Foodit | Food Ordering Web Application || Reactjs | Parcel | Redux Toolkit | TailwindCSS

- LiveDemo SourceCode
- FoodIt is a food ordering web application, **showcasing restaurant listings, interactive menus, and seamless cart management.**

Netflix GPT || Reactjs | Redux Toolkit | Tailwind CSS | Firebase | OpenAI API | TMDB API

- LiveDemo SourceCode
- A React-based web application integrating **OpenAI's GPT APIs** for movie recommendations, powered by **TMDB API,** featuring **Firebase authentication**, a **browse page** displaying movies and trailers, and a **GPT-driven search** for movie recommendations.

VidInteract || Reactjs | Redux Toolkit | TailwindCSS

- LiveDemo SourceCode
- VidInteract is a comprehensive video platform featuring **video listings, real-time chat, nested comments, and powerful search functionality**, inspired by YouTube.

EDUCATION

Bachelor of Technology in Computer Science Engineering
DAV Institute of Engineering & Technology, Jalandhar, Punjab

07/2016 - 07/2020   *Marks/Grade/Percentage :*
8.06CGPA
